

Mindfully Yours

AI Latency Filler Phrase Library

Natural, context-aware phrases for the Digital Companion experience

Prepared from the Mindfully Yours platform proposal, with emphasis on the proposal's real-time voice, avatar, RAG, English/Hindi/Hinglish, and session-resilience requirements.

1. Purpose

The proposal describes a Digital Companion with real-time streaming voice, avatar interaction, English/Hindi/code-mixed conversations, text fallback, reconnection and graceful degradation. It also explicitly calls for suitable fillers to handle latency. The phrases in this document are intended to make short processing or response gaps feel natural rather than technical.

The phrases should sound like a calm companion thinking, listening, checking, or organizing a response. They should not expose internal implementation terms such as embeddings, vector search, retrieval pipelines, or model processing.

2. Very Short Natural Fillers

- Hmm...
- Mm-hmm...
- Okay...
- Right...
- I see...
- Yeah...
- Alright...
- Ah, okay...
- Hmm, yeah...
- Got it...
- One moment...
- Let me see...
- Let me think...
- Okay, just a moment...

3. Thinking / Processing

- “Hmm, let me think about that.”
- “Let me take a moment with that.”
- “Okay, let me think this through.”
- “Let me see how I can best help.”
- “Give me a moment to put that together.”
- “Let me look at this a little more closely.”
- “I want to make sure I understand this properly.”
- “Let me think about what might be most helpful.”
- “Okay, I’m thinking about that.”
- “Let me put this together for you.”

- “There are a couple of things I want to consider here.”
- “Let me take a closer look at what you’re saying.”

4. Listening / Acknowledging

- “I hear you.”
- “I’m with you.”
- “I’m listening.”
- “I understand.”
- “I’m following you.”
- “Yeah, I hear what you’re saying.”
- “Okay, I’m with you.”
- “I see what you mean.”
- “That makes sense.”
- “I understand what you’re getting at.”
- “Okay, I’m taking that in.”
- “I’m listening to what you’re sharing.”

5. Empathetic Pauses

- “Hmm... I hear you.”
- “Yeah... that sounds like a lot.”
- “I hear what you’re saying.”
- “Okay... let’s take a moment.”
- “I’m here with you.”
- “That sounds like something we can slow down and look at.”
- “Okay... I’m listening.”
- “I can see why that might be on your mind.”
- “Let’s take this one step at a time.”
- “You don’t have to rush through this.”
- “Okay... we can sit with that for a moment.”
- “I’m with you. Take your time.”

6. Information / RAG-Style Checking

- “Let me check that for you.”
- “Let me look into that.”
- “Let me see what information I can find.”

- “I’m checking that now.”
- “Let me find the most relevant information.”
- “Give me a moment while I check.”
- “Let me look at what I have on that.”
- “I’m checking a few things before I answer.”
- “Let me make sure I give you the right information.”
- “I want to check that carefully.”

7. Longer-Answer / Organization Fillers

- “Okay, there’s a little to unpack here.”
- “Let’s take this one step at a time.”
- “There are a few ways we can look at this.”
- “Let me put this into something simple.”
- “Okay, here’s how I’m thinking about it.”
- “Let’s break this down together.”
- “I think it might help to look at this from a couple of angles.”
- “Let me explain what I mean.”
- “Okay, let’s work through this together.”
- “There’s a little more to consider here.”

8. When the User's Meaning Is Unclear

- “Hmm, let me make sure I understood you.”
- “Just so I’m following you correctly…”
- “Let me check that I’ve got this right.”
- “I want to make sure I’m understanding what you mean.”
- “Could you tell me a little more about that?”
- “When you say that, do you mean…?”
- “Let me make sure I’m on the same page.”
- “I think I understand, but let me check one thing.”

9. Context Switching / Returning to a Topic

- “Okay, let’s come back to that.”
- “Alright, picking up from what you said…”
- “Let’s look at the other part of this.”
- “Okay, there’s another piece here.”

- “Coming back to what you mentioned earlier...”
- “Let’s connect that with what you said before.”
- “Okay, I see how that connects.”

10. Hindi

- “Hmm... ek minute.”
- “Haan, samajh raha hoon.”
- “Achha... ek pal.”
- “Hmm, sochne do.”
- “Haan, main sun raha hoon.”
- “Achha, isko thoda samajhte hain.”
- “Ek minute, main sochta hoon.”
- “Haan, samajh aa raha hai.”
- “Theek hai, ek pal.”
- “Chalo, isko dheere-dheere dekhte hain.”
- “Haan, main aapki baat samajh raha hoon.”
- “Achha, thoda aur dekhte hain.”
- “Ek second, main iske baare mein sochta hoon.”
- “Haan, aap batao.”
- “Theek hai, main sun raha hoon.”

11. Hinglish

- “Haan, I get what you mean.”
- “Okay, ek minute, let me think.”
- “Achha, let’s look at this together.”
- “Haan, I’m following you.”
- “Thoda sochte hain.”
- “Okay, let me understand this properly.”
- “Haan, that makes sense.”
- “Achha, give me a moment.”
- “Okay, ek second.”
- “Haan, I see what you mean.”
- “Let me check that, ek minute.”
- “Theek hai, let’s take this step by step.”
- “Haan, I’m with you.”

- “Achha, isko thoda break down karte hain.”
- “Okay, pehle isko samajhte hain.”
- “Haan, let me think about that.”
- “Ek minute, I want to make sure I understand.”
- “Achha, okay... let’s see.”

12. Voice-Specific Micro Fillers

- “Hmm...”
- “Mm-hmm...”
- “Yeah...”
- “Okay...”
- “Right...”
- “I see...”
- “Ah, okay...”
- “Hmm, yeah...”
- “Alright...”
- “Okay, I hear you...”

13. Longer Latency Fillers (2–5+ seconds)

- “Give me just a moment while I think about that.”
- “I want to take a moment and give you a thoughtful answer.”
- “Let me look at this carefully before I respond.”
- “Just a moment, I’m putting this together.”
- “Let me take a little time to think this through.”
- “I’m checking this carefully so I can give you something useful.”
- “Give me a moment, I want to make sure I get this right.”

14. Context-Aware Usage Guidance

Use shorter fillers for very small gaps and longer phrases only when the system actually needs additional time. The goal is to bridge latency without making every response sound delayed or repetitive.

Situation	Suggested style	Examples
Very short delay	Micro filler	"Hmm...", "Okay...", "I see..."
Thinking	Natural processing phrase	"Let me think about that."
Listening	Acknowledgement	"I hear you.", "I'm listening."
Emotional conversation	Gentle empathetic pause	"Let's take a moment."
Information lookup	Natural checking phrase	"Let me check that for you."
Longer answer	Organization phrase	"Let's break this down together."
Unclear input	Clarification lead-in	"Let me make sure I understood you."
Hindi conversation	Hindi filler	"Haan, samajh raha hoon."
Hinglish conversation	Mixed-language filler	"Okay, ek minute, let me think."
Longer latency	Extended filler	"Give me just a moment while I think about that."

15. Phrases to Avoid

Avoid exposing internal AI implementation details as conversational fillers. For this proposal, phrases such as the following would be too technical for the companion voice: "I'm processing embeddings," "Searching the vector database," "Retrieving chunks," "Running the RAG pipeline," or "The LLM is generating a response."

Prefer user-facing language such as "Let me check that for you," "Let me look into that," or "Give me a moment while I think about that."

16. Design Principles

- Keep fillers natural and conversational.
- Match the language of the current conversation: English, Hindi, or Hinglish.
- Use empathy carefully in mental-health conversations; do not turn fillers into clinical claims.
- Vary phrases to reduce repetition and avoid a robotic experience.
- Use fillers only when there is actual latency or a conversational reason for a pause.
- Keep technical implementation details invisible to the user.
- Support graceful degradation and text fallback when real-time voice interaction is unavailable.

Source basis: Mindfully Yours proposal sections covering real-time voice/avatar interaction, English/Hindi/code-mixed conversation, session resilience, graceful degradation, RAG, and the explicit requirement that suitable fillers be incorporated to handle latency.
